"We set up the protection camp just before Christmas when the local community lost a High Court case to stop fracking at Kirby Misperton, and it became clear that only people power can protect us. The camp is home to concerned residents of Ryedale and beyond who are here to support the community in its fight against fracking. Over the last 6 months the camp has grown into a busy hub where people from the surrounding towns and villages come and find out about fracking and what they can do to stop it. There is a strong anti-fracking movement in Ryedale, and together we can stop this poisonous industry for good. Come and find out how you can help."
